**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 19 February 2008 has been entered. Claims 1-10, 12-42, 44-64, 69-80 and 82-96 are now pending. The Examiner acknowledges the amendments to claims 1 and 33.

***Allowable Subject Matter***

2. Claims 1-10, 12-42, 44-64, 69-80 and 82-96 are allowable over the prior art of record. The following is a statement of reasons for the indication of allowable subject matter: regarding claims 1-10, and 12-32, the prior art of record does not teach or fairly suggest a method of altering blood flow through the left ventricle comprising the steps of providing an element movable between collapsed and expanded conditions, collapsing the element in a delivery device, advancing the element into the left ventricle in a collapsed state, expanding the element in the left ventricle and evacuating blood from a non-blood flow side following expansion of the element in the left ventricle and securing such an element, forming a hemostatic seal, to the wall of the left ventricle to form a

circumferential attachment to the wall of the ventricle wherein the element separates the left ventricle into a blood flow and non-blood flow side.

Regarding claims 33-42 and 44-64, the prior art of record does not teach or fairly suggest a method of altering blood flow through the left ventricle comprising the steps of providing an element movable between collapsed and expanded conditions, collapsing the element in a delivery device, advancing the element into the left ventricle in a collapsed state, expanding the element in the left ventricle, securing the element to an inner wall of the left ventricle at a position below the papillary muscles so that the element separates the ventricle into a blood flow and an isolated side and evacuating blood from the isolated side after the expanding step.

Regarding claims 69-80 and 82-96, the prior art of record does not teach or fairly suggest providing an element movable between collapsed and expanded conditions, collapsing the element in a delivery device, advancing the element into the left ventricle in a collapsed state, expanding the element in the left ventricle, securing the element to the wall of the ventricle to separate it into a blood flow side and a non-blood flow side and reducing the volume of the non-blood flow side after the expanding step until at least part of the left ventricle wall moves into contact with the element.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pub. No. 2007/0213578 to Khairkhahan et al. discloses a system for improving cardiac function.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
